

# Product Environmental Profile

**Daker Dk Plus-conventional UPS - Single phase  
On-line double conversion VFI without battery**

## LEGRAND'S ENVIRONMENTAL COMMITMENTS

- Incorporate environmental management into our industrial sites**

Of all Legrand sites worldwide, over 85% are ISO 14001-certified (sites belonging to the Group for more than five years).

- Offer our customers environmentally friendly solutions**

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

- Involve the environment in product design and provide informations in compliance with ISO 14025**

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

## REFERENCE PRODUCT

<p><b>Function</b></p>	<p>To protect the load up to 10000 Watts against input power failure during 10 years and switch to the energy storage system to avoid power outage. Product dimensions is 440x132x680; AxLxP (mm). On-line double UPS convertible VFI-SS-111; monophased without batteries; power factor &gt; 0.99. Location of the manufacturing plant : China; Technology of energy storage system by batteries; Input Dependency Characteristics according to IEC 62040-3 :VFI, Multimode; Redundancy : N+0; Mass without energy storage system = 26 kg (without packaging).</p>
<p><b>Reference Product</b></p>	<div style="text-align: center;">  <p>Cat.No 310178</p> <p>Daker DK Plus without battery - 10000 VA</p> </div>

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

## PRODUCTS CONCERNED

The environmental data is representative of the following products:

<p><b>Catalogue Numbers</b></p>
<p>310176, 310177, 310178</p>

# Product Environmental Profile

## Daker Dk Plus-conventional UPS - Single phase On-line double conversion VFI without battery

### ■ CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EU.

<b>Total weight of Reference Product</b>		<b>31037 g (with unit packaging)</b>			
Plastics as % of weight		Metals as % of weight		Other as % of weight	
ABS	0.6%	Steel	32.8%	PWB	46.7%
PBT	0.3%	Al	1.8%	Electric cables	1.0%
PA	<0.1%	Copper alloys	0.3%	LCD screen	0.2%
		Other metal	<0.1%	Others electric components	0.2%
				Packaging as % of weight	
				Paper	13.8%
				PS	1.9%
				PE	0.4%
<b>Total plastics</b>	<b>0.9%</b>	<b>Total metals</b>	<b>34.9%</b>	<b>Total other and packaging</b>	<b>64.2%</b>

Estimated recycled material content: 25% by mass.

### ■ MANUFACTURE

This Reference Product comes from sites that have received ISO14001 certification.

### ■ DISTRIBUTION

Products are distributed from logistics centres located with a view to optimize transport efficiency. The Reference Product is therefore transported over an average distance of 780 km by road from our warehouse to the local point of distribution into the market in Europe.

Packaging is compliant with european directive 2004/12/EU concerning packaging and packaging waste. At their end of life, its recyclability rate is 86 % (in % of packaging weight).

### ■ INSTALLATION

For the installation of the product, only standard tools are needed.

### ■ USE

Under normal conditions of use, this type of Product requires maintenance during the lifetime of the UPS : 1 AC&DC Capacitors of filtering, 2 Fan and 1 Power supply PCB

# Product Environmental Profile

## Daker Dk Plus-conventional UPS - Single phase On-line double conversion VFI without battery

### END OF LIFE

The product end-of-life factors are taken into account during the design phase. Dismantling and sorting of components or materials is made as easy as possible with a view to recycling or failing that, another form of reuse. This product falls within the scope of the WEEE directive (2012/19/EU). Therefore it must be processed through local WEEE recycling/recovery channels.

**• Components to process specifically :**

In accordance with the stipulations of this directive, the following components must be extracted and processed via specific channels in compliance with the WEEE Directive 2012/19/EU: PWB > 10cm<sup>2</sup> : 14657 g

**• Extended product responsibility :**

The sale of this product is subject to a contribution to eco-organisations in each country responsible for managing end-of-life products in the field of application of the European Waste Electronic and Electrical Equipment Directive.

**• Recyclability rate:**

Calculated using the method described in technical report IEC/TR 62635, the recyclability rate of the product is estimated at 78 %. This value is based on data collected from a technological channel operating on an industrial basis. It does not pre-validate the effective use of this channel for the end of life of this product.

Separated into:

- plastic materials (excluding packaging) : 1 %
- metal materials (excluding packaging) : 35 %
- other materials (excluding packaging) : 28 %
- packaging (all types of materials) : 14 %

### ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end-of-life. It is representative from products marketed and used in Europe, in compliance with the local current standards

For each phase, the following modelling elements were taken in account:

<b>Manufacture</b>	Materials and components of the product, all transport for the manufacturing, the packaging and the waste generated by the manufacturing.
<b>Distribution</b>	Transport between the last Group distribution centre and an average delivery point in the sales area.
<b>Installation</b>	The end of life of the packaging.
<b>Use</b>	<ul style="list-style-type: none"> <li>• product with output power 5000 W &lt; P ≤ 10000 W as described in PSR-0010-ed1.1-EN-2015 10 16</li> <li>• Use scenario: for a 8 years working life, The average energy efficiency is 90 %. This modelling duration does not constitute a minimum durability requirement. The methodology for the calculation of the electricity consumption is based on the ENERGY STAR® Program Requirements Product Specification for Uninterruptible Power Supplies (UPSs), Eligibility Criteria Version 1.0. Input power factor is = 0.62 and redundancy : UPS that cannot tolerate any failures while maintaining Normal Mode operation. No redundancy.</li> <li>• Energy model: Electricity Mix; Europe 27, year 2002</li> </ul>
<b>End of life</b>	The default end of life scenario maximizing the impacts.
<b>Software and database used</b>	EIME V5 and its database «CODDE-2015-04»

Air pollution	1.31E+06	m <sup>3</sup>	5.34E+04	4%	4.94E+01	< 1%	4.42E+01	< 1%	1.26E+06	96%	2.51E+02	< 1%

The values of the 27 impacts defined in the PCR-ed3-EN-2015 04 02 are available in the digital database of pep-ecopassport.org website.

For products covered by the PEP other than the Reference product 310178, the environmental impacts of each phase of the lifecycle are assimilated to the impacts of the Reference Product :

- Manufacturing, Distribution, Installation and End of Life phases are proportional to the mass of the product
- Utilisation phase : for ref 310177, the impacts indicator are similar and for ref 310176, the impacts indicator are multiplied by 0.6
